We are presenting our recent conversation with a global systems integrator partner who works with Datadog / Dynatrace and a variety of AI-related solutions to provide a frontline view of the trends that we expect to drive fundamentals for the Observability and AI services landscape over the next 12-18 months. Key Takeaways: ***1) Partner Expects to See Observability Spending Decelerate in 2026.*** The contact expects Observability-specific spending to grow roughly 5% y/y in 2026, which stands out as an oddly low and rather inexplicable outlier, in our view. While AIOps is identified as the fastest-growing sub-segment, the contact sees the broader environment as continuing to be measured and exhibiting high scrutiny around incremental spending. Broadly, customers are focused on tool and software sprawl, potentially suggesting consolidation activity. In a similar vein, the contact notes a continued emphasis on building *"unified Observability"* frameworks spanning application, infrastructure, security, and network domains. ***2) Demand for AI is Strong, but Customers Still Climbing AI Learning Curve.*** The contact emphasizes significant customer demand and interest for AI solutions, with the partner firm selling a record amount of AI-related projects to customers in 2025. This demand spans across industries and specifically calls out particular strength in financial services, which was strong throughout the year, healthcare, which had a strong finish to the year, and a surprising pickup in government, both federal and state, despite the political environment around cost-cutting initiatives. Concurrently with this high level of interest and demand, the partner stresses a massive gap between enterprise AI ambitions and actual implementation capability, with organizations under intense C-suite pressure to deploy AI, but lacking the requisite capabilities, including internal talent, governance frameworks, data quality, etc., to realize these ambitions. Summing the situation, AI is characterized as *"a tsunami that comes at 500 miles an hour"* and business leaders demanding that AI happen 'magically' essentially overnight but that "well, it doesn't happen [magically]." ***3) Competitive Observability Market.*** The contact flags Grafana as a significant competitive threat, noting their belief that the company is in a pre-IPO posture and being "super aggressive." Open source alternatives are also called out as an alternative for customers, in addition to those exploring cloud-native Observability solutions, with the thought process being that *"they are not going to want to go and buy an additional tool."* Regarding competitive threats from Chronosphere / Palo Alto [note that Palo Alto is covered by JPM Analyst Brian Essex] and Observe / Snowflake, the partner largely sees the current time as too early to tell, but emphasizes that each of the aforementioned companies and Datadog address different segments of the market, while acknowledging some overlap, and therefore doesn't necessarily see material nearer-term competitive implications. ***4) AI-Catalyzed Job Displacement a Reasonable Expectation, but Won't Happen Overnight.*** The contact opines that while AI-driven job losses are inevitable, the process will be gradual, and is

Summary Investment Thesis and Valuation

Investment Thesis

Datadog is a leading provider of monitoring and security for public cloud, private cloud, and on-premises applications, with these solutions delivered via a comprehensive, unified platform. The company's technologies integrate and automate infrastructure monitoring, application performance monitoring, and log management to enable seamless observability, cloud security, and developer use cases. The company sees a large portion of the ITOM market as its target, which Gartner estimates will represent a $53B opportunity by 2025. The combination of its large market opportunity, along with rapid growth, positive PF operating margin, and FCF generation, put it in an elite category. This market includes both legacy on-premise and private cloud environments as well as modern public cloud environments, which are expected to grow faster than the ITOM market as a whole. While the legacy environments include more competitive displacements, the cloud infrastructure space is primarily greenfield. We believe Datadog is the leader in its market and the preferred tool among DevOps professionals, providing a single-pane-of-glass experience across dynamic operating environments. As a result, we see Datadog as a direct beneficiary of the secular trends of digital transformation, which is driving an increase in workloads, as well as cloud migration, which is driving a higher proportion of workloads to public clouds, positioning it well in the drive toward modernization.

mark.r.murphy@jpmchase.com

currently hampered by poor underlying data and infrastructure: *"Garbage in, garbage out, and when it's AI-related, it's at the speed of light garbage in and at the speed of light garbage out."* The most effective automation use cases so far have focused on narrow, repeatable tasks like patching, rather than broad solutions, a trend we've called out many times over the last several quarters. Even in cases where certain companies have seen relatively high AI success, actual staff reductions have been modest and not more than approximately 500 expected to be impacted by AI, contrasting with ambitions to *"cut billions in operational burden,"* which the contact describes as unrealistic at least in the near-term. *Net/net: We see Datadog as a vibrant category leader in a market that is benefiting from the relentless modernization trend, along with a highly attractive financial profile and history of execution. However, we maintain a balanced view on the uncertain macroeconomic and geopolitical environment. Datadog's shares trade at a premium revenue multiple and FCF multiple, which we think is justified to some extent given the long-term scaling of the business with superb efficiency and its strong positioning within an attractive market benefiting from digital transformation and cloud migration. Remain OW; Dec-26 PT of $200.*

Detailed Ecosystem Insights

In order to assess trends and business momentum for companies in our coverage, we continually seek the feedback and expertise of customers and partners. Our Ecosystem Insights are an unbiased selection of comments intended to add incremental color to the Software sector. Additionally, it is the view of one customer or partner and might not be statistically significant, and, as such, we would wait to hear from other customers and partners to inform our view from a mosaic of information.

General

- Contact is a senior consultant at a global systems integrator (GSI) with deep expertise in Observability, AI, and data management.

2026 Spending Outlook

- Contact is cautiously optimistic overall on enterprise IT spending, but sees several countervailing factors: (a) the pace of AI change is creating confusion and paralysis among clients, (b) 80% of AI projects are reportedly failing, and (c) there is significant geopolitical and macroeconomic uncertainty.
- ***Expects AI Ops to be the strongest growth area within Observability***, with demand increasingly focused on resiliency rather than traditional monitoring, adding that Observability is foundational to resiliency but is only one of the components.
- Notes that organizations continue to struggle with tool sprawl, license creep, and overlapping capabilities, creating pressure for unified Observability that spans application, infrastructure, security, and network domains, a continuation of themes seen in 2025 but incremental focus from customers, suggesting continued movement toward broader / platform solutions.

Datadog & Observability Market

- ***Expects Observability spending growth of roughly 5% year-over-year in 2026, which would mean a significant deceleration from current vendor growth rates, and contact does not see 20-25% growth rates as sustainable for most vendors.***
- Overall sees Datadog as well-positioned and competitive in the market, but notes that the space is highly sought after by many software companies as well as having open-source options.
- Regarding recent competitive activity such as Palo Alto's acquisition of Chronosphere and Snowflake's acquisition of Observe, the contact sees it being too early to assess impact, but does argue that, while there is some degree of overlap, in reality these solutions operate in fundamentally different market segments, with Datadog excelling at AI-driven Observability across metrics, logs, and traces, while Snowflake is a data platform without the same native Observability tooling, and Palo Alto's strength is network security and SIEM.
- The industry expert calls out a trend in which large enterprises are considering where authoritative data resides when building unified Observability, with one major client currently running both Datadog and Dynatrace exploring unified Observability. The contact adds that there is a chance that the proper place for data

Mark R Murphy AC
(1-415) 315-6736
mark.r.murphy@jpmchase.com

to reside may ultimately be outside of either platform since it needs to integrate with cyber/SIEM, application, infrastructure, and network data.

- Flags Grafana as a significant competitive force to watch, ***noting his belief that it is in a pre-IPO posture and being "super aggressive."***
- Describes some major financial institutions moving in the direction of open-source Observability stacks using Grafana, OpenTelemetry, and native hyperscaler tooling rather than purchasing additional commercial tools like Datadog or Dynatrace.
- ***"If you're talking about an organization that is focusing on a hyperscaler and thinking 'I'm going to bring all my services there,' chances are they are not going to want to go and buy an additional tool. They can do it from open source or from the hyperscaler services, which they are already paying for."***
- Also highlights Cribl as an important component of the emerging open-source Observability stack, noting Google's investment in the company.
- Sees opportunity in the market to package and sell "resiliency" as an umbrella service that encompasses DevOps, Observability, cyber, and platform engineering as an opportunity and what their partner firm is focused on.

AI Specific Trends

- Overall, the contact describes AI demand as strong across industries, with particular strength in financial services, which was strong throughout the year; healthcare, which had a strong finish to the year; and a surprising pickup in government, both federal and state, despite the political environment around cost-cutting initiatives.
- Partner explains that their firm has developed internal AI bundled solutions built on top of partner platforms such as Anthropic, ServiceNow, and others and leveraging MCP servers, LLMs, and vector databases to operationalize AI. These services are not licensed separately but rather wrapped into the services provided to customers. The result is that the partner firm is able to provide project solutions that might otherwise cost $10M to be delivered for $2M using the accelerators.
- The industry expert emphasizes that there is currently a large gap between enterprise AI ambitions and the ability to actually implement and operationalize AI in practice, explaining that ***"AI is a tsunami that comes at 500 miles an hour. Organizations have no chance to react. They have no chance to upskill their staff… They are just receiving pressure from the C-suite because the CIO read some magazine and went to some AWS conference. And then all of a sudden, [AI is supposed to] magically happen. Well, it doesn't happen[magically]."***
- Highlights a pattern where organizations are going from a "use case" mindset to a "patterns" mindset, building generic, reusable Agents that can be adapted across multiple use cases rather than proliferating one-off implementations, adding that without proper governance and frameworks, use case proliferation becomes unmanageable and fails, reflecting a lot of the failed AI projects referenced in the public mind.
- Notes that while the pipeline is healthy, sales cycles are elongating meaningfully, ***actual spending decisions that used to take weeks are now taking months, despite that the contact cautiously optimistic about Q1 2026.***

AI Job Displacement

- Believes AI-driven job losses are coming, but will be slow and incremental rather than dramatic; the expectation versus reality gap is large as executives envision

Mark R Murphy AC
(1-415) 315-6736
mark.r.murphy@jpmchase.com

replacing thousands of FTEs with digital workers, but the underlying infrastructure (CMDBs, knowledge bases) is often too poor to support it: ***"Garbage in, garbage out, and when it's AI-related, it's at the speed of light garbage in and at the speed of light garbage out."***

- ***The most successful automation use cases have been highly repeatable, narrow tasks like patching.***
- Illustrating the point, the partner explains that even with a certain company that found significant success with AI relative to other implementations, they were not able identify more than approximately 500 staff reductions from AI-driven automation, contrasting with ambitions to ***"cut billions in operational burden,"*** which the contact describes as unrealistic at least in the near-term.

Investment Thesis, Valuation and Risks

Datadog *(Overweight; Price Target: $200.00)*

Investment Thesis

Datadog is a leading provider of monitoring and security for public cloud, private cloud, and on-premises applications, with these solutions delivered via a comprehensive, unified platform. The company's technologies integrate and automate infrastructure monitoring, application performance monitoring, and log management to enable seamless observability, cloud security, and developer use-cases. The company sees a large portion of IT Operations Management as its target market, which Gartner estimates will represent a $53B opportunity by 2025. The combination of its large market opportunity, along with rapid growth, positive PF operating margin, and cash flow generation, put it in an elite category. This market includes both legacy on-premise and private cloud environments as well as modern public cloud environments, including multi- and hybrid-cloud, which are expected to grow faster than the IT Operations Management market as a whole. While the legacy environments include more competitive displacements, the cloud infrastructure space is primarily greenfield. We believe Datadog is the leader in its market and the preferred tool by DevOps professionals, providing a single-pane-of-glass experience across numerous and dynamic operating environments. As a result, we see Datadog as a direct beneficiary of the secular trends of digital transformation, which is driving an increase in workloads overall, as well as cloud migration, which is driving a higher proportion of workloads to public clouds, positioning it well in the drive toward modernization.

Valuation

Our $200 Dec-26 PT is based on 59x EV/CY26E uFCF using $1.2B of uFCF for CY26E. Our multiple for DDOG shares is slightly above vs. Fast-Growing Infrastructure Software Vendors, which trade at ~55x on average. We believe Datadog's multiple is warranted given its category leadership, multiple vectors of growth, benefit from ongoing cloud migrations, and AI-related tailwinds, offset by its usage-based model, which can exhibit greater volatility than other business models.

Risks to Rating and Price Target

Risks to the Downside

- **Native Hypercloud DevOps Tools.** While there are various public cloud options, the market is currently dominated by Amazon's Amazon Web Services (AWS), Microsoft's Azure, and Google's Google Cloud Platform (GCP) platforms. These platforms feature native DevOps observability and security tools that compete with Datadog. Should these services become more attractive and/or cost competitive for customers, the company may face increased competition and price pressure, potentially impacting growth and profitability.
- **Acute Execution Risk.** Datadog has grown rapidly, both in terms of revenue and head count, increasing head count 156% in 2020 compared with 2019 and 147% in 2021 compared with 2020. As a result, maintaining the company's growth curve requires excellent execution and ramping of sales reps as it supports its best-in-class sales efficiency. While the company has a history of excellent execution, should any challenges emerge in its execution, growth and margins will likely suffer and investor sentiment erode, likely resulting in deceleration and multiple contraction.
- **Macroeconomic Gyrations.** Recent macroeconomic uncertainties have caused many

IT customers to scrutinize deals more carefully, defer modernization products, and/or optimize or reduce spending. Should the environment worsen and customers further defer or reduce IT spending, Datadog's growth curve may be negatively impacted, with the company potentially particularly affected given its exposure to SMB customers.

Company-Specific Disclosures: Important disclosures, including price charts and credit opinion history tables (if applicable), are available for compendium reports and all J.P. Morgan–covered companies, and certain non-covered companies, by visiting https://www.jpmm.com/research/disclosures, calling 1-800-477-0406, or e-mailing research.disclosure.inquiries@jpmorgan.com with your request.

Datadog (DDOG, DDOG US) Price Chart

Date	Rating	Price ($)	Price Target ($)
08-Aug-23	N	106.30	90
07-Nov-23	OW	79.55	115
13-Feb-24	OW	134.85	140
06-Nov-25	OW	154.98	200

Source: Bloomberg Finance L.P. and J.P. Morgan; price data adjusted for stock splits and dividends.
Initiated coverage Oct 14, 2019. All share prices are as of market close on the previous business day.

The chart(s) show J.P. Morgan's continuing coverage of the stocks; the current analysts may or may not have covered it over the entire period.
J.P. Morgan ratings or designations: OW = Overweight, N= Neutral, UW = Underweight, NR = Not Rated

Explanation of Equity Research Ratings, Designations and Analyst(s) Coverage Universe:
J.P. Morgan uses the following rating system: Overweight (over the duration of the price target indicated in this report, we expect this stock will outperform the average total return of the stocks in the Research Analyst's, or the Research Analyst's team's, coverage universe); Neutral (over the duration of the price target indicated in this report, we expect this stock will perform in line with the average total return of the stocks in the Research Analyst's, or the Research Analyst's team's, coverage universe); and Underweight (over the duration of the price target indicated in this report, we expect this stock will underperform the average total return of the stocks in the Research Analyst's, or the Research Analyst's team's, coverage universe. NR is Not Rated. In this case, J.P. Morgan has removed the rating and, if applicable, the price target, for this stock because of either a lack of a sufficient fundamental basis or for legal, regulatory or policy reasons. The previous rating and, if applicable, the price target, no longer should be relied upon. An NR designation is not a recommendation or a rating. Some stocks under coverage have a rating but no price target; in these cases, we expect the stock will outperform/perform in line/underperform the average total return of the stocks in the Research Analyst's, or the Research Analyst's team's, coverage universe of the relevant duration of the region. In our Asia (ex-Australia and ex-India) and U.K. small- and mid-cap Equity Research, each stock's expected total return is compared to the expected total return of a benchmark country market index, not to those Research Analysts' coverage universe. If it does not appear in the Important Disclosures section of this report, the certifying Research Analyst's coverage universe can be found on J.P. Morgan's Research website, https://www.jpmorganmarkets.com.

Coverage Universe: Murphy, Mark R: Adobe Inc (ADBE), Akamai Technologies, Inc. (AKAM), Cloudflare (NET), Confluent (CFLT), CoreWeave (CRWV), Datadog (DDOG), Dayforce (DAY), DocuSign (DOCU), DoubleVerify (DV), Dropbox (DBX), Dynatrace (DT), Figma (FIG), HubSpot (HUBS), Intuit (INTU), Microsoft (MSFT), Monday.com (MNDY), OneStream (OS), Oracle (ORCL), Paycom (PAYC), Salesforce Inc (CRM), ServiceNow (NOW), Snowflake (SNOW), Twilio (TWLO), Workday (WDAY), Zoom Video (ZM), ZoomInfo (GTM)

J.P. Morgan Equity Research Ratings Distribution, as of January 01, 2026

	Overweight (buy)	Neutral (hold)	Underweight (sell)
J.P. Morgan Global Equity Research Coverage*	51%	37%	12%
IB clients**	47%	47%	35%
JPMS Equity Research Coverage*	49%	38%	13%
IB clients**	72%	70%	53%

***Please note that the percentages may not add to 100% because of rounding.**
****Percentage of subject companies within each of the "buy," "hold" and "sell" categories for which J.P. Morgan has provided investment banking services within the previous 12 months.**
For purposes of FINRA ratings distribution rules only, our Overweight rating falls into a buy rating category; our Neutral rating falls into a hold rating category; and our Underweight rating falls into a sell rating category. Please note that stocks with an NR designation are not included in the table above. This information is current as of the end of the most recent calendar quarter.

Equity Valuation and Risks: For valuation methodology and risks associated with covered companies or price targets for covered companies, please see the most recent company-specific research report at http://www.jpmorganmarkets.com, contact the primary analyst or your J.P. Morgan representative, or email research.disclosure.inquiries@jpmorgan.com. For material information about the proprietary models used, please see the Summary of Financials in company-specific research reports and the Company Tearsheets, which are available to download on the company pages of our client website, http://www.jpmorganmarkets.com. This report also sets out within it the material underlying assumptions used.

History of Investment Recommendations:
A history of J.P. Morgan investment recommendations disseminated during the preceding 12 months can be accessed on the Research & Commentary page of http://www.jpmorganmarkets.com where you can also search by analyst name, sector or financial instrument.

Analysts' Compensation: The research analysts responsible for the preparation of this report receive compensation based upon various factors, including the quality and accuracy of research, client feedback, competitive factors, and overall firm revenues.

Other Disclosures

J.P. Morgan is a marketing name for investment banking businesses of JPMorgan Chase & Co. and its subsidiaries and affiliates worldwide.

UK MIFID FICC research unbundling exemption: UK clients should refer to UK MIFID Research Unbundling exemption for details of J.P. Morgan's implementation of the FICC research exemption and guidance on relevant FICC research categorisation.

All research material made available to clients are simultaneously available on our client website, J.P. Morgan Markets, unless specifically permitted by relevant laws. Not all research content is redistributed, e-mailed or made available to third-party aggregators. For all research material available on a particular stock, please contact your sales representative.

Any long form nomenclature for references to China; Hong Kong; Taiwan; and Macau within this research material are Mainland China; Hong Kong SAR (China); Taiwan (China); and Macau SAR (China).

J.P. Morgan Research may, from time to time, write on issuers or securities targeted by economic or financial sanctions imposed or administered by the governmental authorities of the U.S., EU, UK or other relevant jurisdictions (Sanctioned Securities). Nothing in this report is intended to be read or construed as encouraging, facilitating, promoting or otherwise approving investment or dealing in such Sanctioned Securities. Clients should be aware of their own legal and compliance obligations when making investment decisions.

Any digital or crypto assets discussed in this research report are subject to a rapidly changing regulatory landscape. For relevant regulatory advisories on crypto assets, including bitcoin and ether, please see https://www.jpmorgan.com/disclosures/cryptoasset-disclosure.

The author(s) of this research report may not be licensed to carry on regulated activities in your jurisdiction and, if not licensed, do not hold themselves out as being able to do so.

Exchange-Traded Funds (ETFs): J.P. Morgan Securities LLC ("JPMS") acts as authorized participant for substantially all U.S.-listed ETFs. To the extent that any ETFs are mentioned in this report, JPMS may earn commissions and transaction-based compensation in connection with the distribution of those ETF shares and may earn fees for performing other trade-related services, such as securities lending to short sellers of the ETF shares. JPMS may also perform services for the ETFs themselves, including acting as a broker or dealer to the ETFs. In addition, affiliates of JPMS may perform services for the ETFs, including trust, custodial, administration, lending, index calculation and/or maintenance and other services.

Options and Futures related research: If the information contained herein regards options- or futures-related research, such information is available only to persons who have received the proper options or futures risk disclosure documents. Please contact your J.P. Morgan Representative or visit https://www.theocc.com/components/docs/riskstoc.pdf for a copy of the Option Clearing Corporation's Characteristics and Risks of Standardized Options or https://www.finra.org/sites/default/files/2020-08/Security_Futures_Risk_Disclosure_Statement_2020.pdf for a copy of the Security Futures Risk Disclosure Statement.

Changes to Interbank Offered Rates (IBORs) and other benchmark rates: Certain interest rate benchmarks are, or may in the future become, subject to ongoing international, national and other regulatory guidance, reform and proposals for reform. For more information, please consult: https://www.jpmorgan.com/global/disclosures/interbank_offered_rates

Private Bank Clients: Where you are receiving research as a client of the private banking businesses offered by JPMorgan Chase & Co. and its subsidiaries ("J.P. Morgan Private Bank"), research is provided to you by J.P. Morgan Private Bank and not by any other division of J.P. Morgan, including, but not limited to, the J.P. Morgan Corporate and Investment Bank and its Global Research division.

Legal entity responsible for the production and distribution of research: The legal entity identified below the name of the Reg AC Research Analyst who authored this material is the legal entity responsible for the production of this research. Where multiple Reg AC Research Analysts authored this material with different legal entities identified below their names, these legal entities are jointly responsible for the production of this research. Where more than one legal entity is listed under an analyst's name, the first legal entity is responsible for the production unless stated otherwise. Research Analysts from various J.P. Morgan affiliates may have contributed to the production of this material but may not be licensed to carry out regulated activities in your jurisdiction (and do not hold themselves out as being able to do so). Unless otherwise stated below in the legal entity disclosures, this material has been distributed by the legal entity responsible for production, or where more than one legal entity is listed under the analyst's name, the first legal entity will be responsible for distribution. If you have any queries, please contact the relevant Research Analyst in your jurisdiction or the entity in your jurisdiction that has distributed this research material.

Morgan Markets Limited (“JPMML Ltd”) which is authorised and regulated by the Financial Conduct Authority. Unless specified to the contrary, this material is distributed in the UK by JPMS plc and is directed in the UK only to: (a) persons having professional experience in matters relating to investments falling within article 19(5) of the Financial Services and Markets Act 2000 (Financial Promotion) (Order) 2005 (“the FPO”); (b) persons outlined in article 49 of the FPO (high net worth companies, unincorporated associations or partnerships, the trustees of high value trusts, etc.); or (c) any persons to whom this communication may otherwise lawfully be made; all such persons being referred to as "UK relevant persons". This material must not be acted on or relied on by persons who are not UK relevant persons. Any investment or investment activity to which this material relates is only available to UK relevant persons and will be engaged in only with UK relevant persons. A description of J.P. Morgan EMEA’s policy for prevention and avoidance of conflicts of interest related to the production of Research can be found at the following link: J.P. Morgan EMEA - Research Independence Policy.

U.S.: J.P. Morgan Securities LLC (“JPMS”) is a member of the NYSE, FINRA, SIPC, and the NFA. JPMorgan Chase Bank, N.A. is a member of the FDIC. Material published by non-U.S. affiliates is distributed in the U.S. by JPMS who accepts responsibility for its content.

General: Additional information is available upon request. The information in this material has been obtained from sources believed to be reliable. While all reasonable care has been taken to ensure that the facts stated in this material are accurate and that the forecasts, opinions and expectations contained herein are fair and reasonable, JPMorgan Chase & Co. or its affiliates and/or subsidiaries (collectively J.P. Morgan) make no representations or warranties whatsoever to the completeness or accuracy of the material provided, except with respect to any disclosures relative to J.P. Morgan and the Research Analyst's involvement with the issuer that is the subject of the material. Accordingly, no reliance should be placed on the accuracy, fairness or completeness of the information contained in this material. There may be certain discrepancies with data and/or limited content in this material as a result of calculations, adjustments, translations to different languages, and/or local regulatory restrictions, as applicable. These discrepancies should not impact the overall investment analysis, views and/or recommendations of the subject company(ies) that may be discussed in the material. Artificial intelligence tools may have been used in the preparation of this material, including assisting in data analysis, pattern recognition, and content drafting for research material. J.P. Morgan accepts no liability whatsoever for any loss arising from any use of this material or its contents, and neither J.P. Morgan nor any of its respective directors, officers or employees, shall be in any way responsible for the contents hereof, apart from the liabilities and responsibilities that may be imposed on them by the relevant regulatory authority in the jurisdiction in question, or the regulatory regime thereunder. Opinions, forecasts or projections contained in this material represent J.P. Morgan's current opinions or judgment as of the date of the material only and are therefore subject to change without notice. Periodic updates may be provided on companies/industries based on company-specific developments or announcements, market conditions or any other publicly available information. There can be no assurance that future results or events will be consistent with any such opinions, forecasts or projections, which represent only one possible outcome. Furthermore, such opinions, forecasts or projections are subject to certain risks, uncertainties and assumptions that have not been verified, and future actual results or events could differ materially. The value of, or income from, any investments referred to in this material may fluctuate and/or be affected by changes in exchange rates. All pricing is indicative as of the close of market for the securities discussed, unless otherwise stated. Past performance is not indicative of future results. Accordingly, investors may receive back less than originally invested. This material is not intended as an offer or solicitation for the purchase or sale of any financial instrument. The opinions and recommendations herein do not take into account individual client circumstances, objectives, or needs and are not intended as recommendations of particular securities, financial instruments or strategies to particular clients. This material may include views on structured securities, options, futures and other derivatives. These are complex instruments, may involve a high degree of risk and may be appropriate investments only for sophisticated investors who are capable of understanding and assuming the risks involved. The recipients of this material must make their own independent decisions regarding any securities or financial instruments mentioned herein and should seek advice from such independent financial, legal, tax or other adviser as they deem necessary. J.P. Morgan may trade as a principal on the basis of the Research Analysts' views and research, and it may also engage in transactions for its own account or for its clients' accounts in a manner inconsistent with the views taken in this material, and J.P. Morgan is under no obligation to ensure that such other communication is brought to the attention of any recipient of this material. Others within J.P. Morgan, including Strategists, Sales staff and other Research Analysts, may take views that are inconsistent with those taken in this material. Employees of J.P. Morgan not involved in the preparation of this material may have investments in the securities (or derivatives of such securities) mentioned in this material and may trade them in ways different from those discussed in this material. This material is not an advertisement for or marketing of any issuer, its products or services, or its securities in any jurisdiction.
