Datadog, Inc. | North America

Key Pillars of Demand on the Upswing; Upgrade to OW with \$180 PT

WHAT'S CHANGED

Datadog, Inc. (DDOG.O)	From	To
Rating	Equal-weight	Overweight

The return of digital transformation & cloud migration initiatives and an emerging opportunity to monitor agentic apps are fueling accelerating core growth which should sustain thru 2027. While risk to initial guide remains, improving underlying growth trends should ultimately drive shares higher.

Key Takeaways

- Upgrading to OW as underlying growth trends heading into 2026 are improving
- We see better core growth driven by the key pillars of observability adoption – cloud migrations and digital transformation initiatives
- Furthermore, ramping deployments of agentic applications require Observability to be successful, creating a new vector of growth over the next several years
- While we see NT risk to 2026 guidance, which is factored into our estimates, we see this as a clearing event for investors to focus on improving core growth
- Upgrade to OW while maintaining our \$180 PT

Upgrading to OW as Core Business Trends Improve and Observability Becomes More Strategic. While we have long been positive on Datadog's long-term growth opportunity and ability to sustain leadership in the highly competitive Observability market, over the past year we have remained on the sidelines given the prospect of moderating growth trends in Datadog's core business – which today makes up >90% of the business – and given ongoing uncertainty with respect to the company's future growth prospects with its largest AI customer (OpenAI). Heading into 2026, we believe underlying growth trends are improving for the following reasons: 1) public cloud growth is accelerating and for reasons beyond just AI, 2) core demand drivers for Observability including cloud migrations and digital transformation initiatives are on the upswing, 3) ramping deployments of agentic architectures and AI agents likely requires Observability to be successful providing Datadog another vector of growth in its core business, and 4) newer product categories including cloud security, database monitoring and incident management are starting to contribute meaningfully to growth in aggregate. As a result, we forecast a 23% CAGR core revenue (ex OpenAI) and 25% FCF CAGR from 2025 thru 2028 resulting in \$4.09 in FCF per share by 2028. **With the core business getting better and underlying demand drivers for Observability getting stronger, we**

upgrade shares to Overweight and maintain our \$180 PT representing 43% upside from current trading levels.

Initial 2026 Guidance Represents a Near-term Risk Which We Have Factored Into Our 2026 Estimates.

While we believe Datadog's revenue growth ex OpenAI is accelerating – we estimate ex-OAI growth accelerated to 22% in 3Q25 from +20% in 2Q25 – we still see risk to initial 2026 revenue and operating margin guidance (see [Assessing the Risk to 2026 Guidance](#)). OpenAI, which we estimate is just under a 10% customer, is in the process of diversifying away from Datadog. To reflect this risk, our 2026 estimates assume: 1) flat OpenAI revenue dollars compared to 2025 (\$274 million or 0% growth) and 2) core revenue ex OpenAI growth of ~18.5% to account for typical conservatism on the initial guide. This implies total revenue growth of +17% and operating margin of 20% – both below consensus looking for +21% revenue growth and 23% operating margin. Should our estimates prove correct in terms of the initial outlook for 2026, we think stock may react negatively. ***However, we think such a scenario would represent a clearing event for the stock as we believe the market will ultimately reward Datadog's improving underlying growth trends ex OpenAI and we believe that a full churn of OpenAI is unlikely.***

Why Upgrade Now? With shares down ~35% from the recent highs in early November, we think the risk of a below consensus initial 2026 revenue and margin guide has started to get priced in (but not yet fully). Meanwhile, core growth ex OpenAI is improving – having accelerated in 3Q25 – and we expect core growth to improve further in 4Q25, sustaining in the low to mid 20% through 2027. Our confidence stems from the fact that public cloud growth is accelerating (see [3Q25 Hyperscaler Results: Public Cloud Growth in a Healthy Place](#)) not just from AI demand but also due to an upswing in the core pillars of Observability demand – cloud migration and digital transformation initiatives. We also cite Datadog's ability to win large consolidation opportunities given the depth and breadth of the platform, growing contribution from products outside of Observability (security, database monitoring, incident response among others), clear evidence that the company is winning among AI-natives, and an emerging opportunity to monitor and manage agentic deployments in making the case for improving underlying growth at Datadog.

Maintaining our \$180 PT. At current levels against consensus estimates, Datadog trades 8.5x CY27 sales, or 0.41x adjusted for CY25e-'27e revenue growth. Looking at FCF, shares trade at 31x EV/CY27 FCF or 1.2x adjusted for growth. This represents a discount to peers trading at a CY27 Sales median of 9.7x (0.51x growth-adj) and 38x CY27 FCF (1.37x growth-adj). To arrive at our \$180 price target we apply a 46x multiple (1.5x growth-adj) to our CY28 FCF per share estimate of \$4.09, discount it back one year at an ~11% CAGR, and add back \$12 of net cash per share.

Why We Are Getting On Board Datadog Now?

1) Core Demand Drivers for Observability on the Upswing. Core demand drivers for Observability continue to move higher as public cloud spend remains healthy with **hyperscaler growth** having now accelerated for two consecutive quarters (+29% in Q3 from +27% in Q2 and +24% in Q1). In particular, AWS which represents a greater portion of Datadog deployments, showed the sharpest acceleration with +20% YoY cc growth in Q3 from +17% in Q2. Importantly, hyperscalers frame the improvement as not just AI, but also a clear rebound in migration activity and a broader return of digital transformation initiatives, all of which increases architectural complexity, distributed dependencies, and the need to monitor core workloads alongside AI-driven ones.

2) Core Business Is Getting Better. While the future spending plans of OpenAI have dominated the investor debate in recent months, our focus has been on when the core business would start to show signs of improvement. To that end, **Q3 results** provided several supporting data points, including 1) revenue growth ex-AI native customers accelerated to +20% YoY from +18% in Q2 while AI-native customers ex-OpenAI also accelerated; 2) accelerating core trend continuing in October; 3) a healthy spending environment for observability; 4) sales investments and go-to-market changes made over the past year that are now translating into better sales productivity; 5) strong new logo bookings, which doubled year over year; and 6) the strongest sequential usage growth among existing customers in three years. **We believe core business acceleration will continue into Q4 as we consider the building momentum coming out of Q3 and growing evidence from hyperscalers and our CIO survey that cloud growth is accelerating and digital transformation initiatives are being re-prioritized.**

Exhibit 1: Datadog Revenue ex AI-Native Customers Accelerated to +20% YoY in Q3 from +18% in Q2

Source: Company reports, Morgan Stanley Research

3) Ramping Deployment of AI Agents Requires Observability to be Successful. The key distinction between pre-AI era of software and AI era of software is that in the pre-AI era software executes pre-defined logic whereas in the AI era the software decides what to do

next. AI agents are fundamentally non-deterministic, use tools dynamically, and execute multi-step reasoning often across multiple systems. This creates a completely new model of failure that we believe will make Observability go from a nice-to-have to a must have. Accordingly, we think the steady proliferation of AI agents across the enterprise will result in a power driver of Observability adoption for the following reasons: 1) a small issue with an agentic deployment can result in cascading sequence of errors and Observability will allow customers to catch these cascading errors early; 2) Observability will serve as the primary means for customers to record, document and diagnose the actions taken by agents including what information was retrieved, what the agent believed, what tools it called and in which order did it call them, and what information the agent communicated to the end user; 3) given that agents have privileged access to sensitive data to be useful, observability tools can enforce critical enterprise functions such as auditability (which agent initiated a particular actions, what data was accessed, what data was changed), policy enforcement (were the designed guardrails enforced or noted?), and anomaly detection (unusual tool usage patterns, data usage spikes, data exfiltration occurrences); and 4) controlling costs including monitoring/managing token usage, tool calls and retrieving data.

4) Status as a Platform Consolidator Translating to Consistent Market Share Gains .

Rather than selling a point product, Datadog has built a platform capable of delivering a broad, tightly integrated set of functionalities that let customers standardize on one system of record across metrics, traces, and logs, while bringing them into a single pane of glass for cross-team troubleshooting and faster time to resolution. Such breadth enables Datadog to consolidate the sprawl of monitoring tools used by the majority of enterprises today, a critical benefit as tool consolidation is increasingly a top priority of IT departments, and which has allowed Datadog to be the top share gainer in its core observability market (see [Exhibit 2](#)). In addition, consolidation has become a key driver of deal closure in the market, as it can simultaneously help reduce total cost of ownership and improve productivity. Today, vendors across infrastructure and security consistently describe these as C-level, strategic decisions, requiring quantifiable ROI. For instance, in Q3 Datadog landed a 7-figure deals justified by >\$1 million in annual savings from tool costs alone, by consolidating >10 commercial and open source tools with 11 Datadog modules.

Exhibit 2: Datadog Has Been the Top Share Gainer in its Core Observability Market For Several Years

Source: IDC Software Tracker

5) Success With AI-natives Bodes Well For LT Growth. Datadog increasingly looks like its "re-running the cloud-native playbook" in the AI-native era, emerging as the platform of choice for AI-native organizations much as it became the go-to observability vendor for cloud-native startups nearly a decade ago. Disclosed customer metrics highlight both breadth and rapid scaling within this cohort, with >500 AI-native customers as of 3Q25, including more than 100 spending >\$100K in ARR, more than 15 spending >\$1M, and three spending >\$10M (including the largest customer OpenAI at ~\$330M ARR per our estimate). On the revenue side, managements sizes the AI-native business at 12% of total revenue as of Q3, from which we estimate OpenAI making up 9%. Importantly, management highlighted the AI-native cohort ex-OpenAI as accelerating in Q3, and our estimates suggests this stream is still early but growing quickly at ~3% of total revenue today while growing >135% YoY, supporting our view that Datadog is consolidating share in the AI-native stack as these customers scale usage and broaden module adoption.

6) Emerging Products Showing Strong Adoption. Datadog is showing strong traction in its newer products, even as core Observability (Infrastructure Monitoring, APM, and Log Management) still represents ~90% of the business today, highlighting a meaningful next leg of growth developing across Security, Digital Experience, Flex Logs, and Database Monitoring. In particular, management has pointed to **1) significant acceleration in security adoption**, with Security ARR accelerating to mid-50% YoY growth in 3Q25 after growing mid-40% in Q2 when it surpassed \$100M in ARR with 7,500 customers (24% of total). Notably the company is starting to see success attaching Cloud SIEM in larger deals while also seeing fast uptake across broader cloud security modules; **2) Digital Experience** portfolio (RUM, Synthetics, Product Analytics) **now exceeding \$300M in ARR**, with Product Analytics specifically called out as a "very fast ramp" and already adopted by 1K+ customers; **3) Flex Logs surpassing \$50M ARR by 1Q25**, the fastest ramp to that level the company has seen in just six months; and **4) Database Monitoring** (within APM suite) **approaching \$50M ARR in 1Q25 growing ~60% YoY and used by 5K+ customers.**

7) Datadog Is Penetrating a Large and Expanding Market Opportunity. Datadog is a top player and has consistently gained share in its core Observability market, supported by its ability to consolidate a broad set of functionality into a tightly integrated unified platform. Today, the Observability market represents a \$25 billion market opportunity expected to

grow at a 10% CAGR through 2029 to reach \$36 billion. In addition, while still early days Datadog is making progress in penetrating the Security and IT Service Management markets. Here, the company is benefiting from the same platform expansion motion, with Security showing accelerating adoption and expanding customer penetration, reinforcing Datadog's ability to extend into adjacent IT workflows. As such, expanding Datadog's market opportunity to \$89 billion today growing at a 13% CAGR through 2029 to reach \$145 billion, with Security representing the fastest growing market at a +15% CAGR.

Exhibit 3: We Identify a Large and Expanding Market Opportunity Composed of Three Key Markets, Sized at \$89 Billion Today and Growing at a 13% CAGR Through 2029

Source: IDC Software Tracker

Where Could We Be Wrong?

1) Intensifying Competition Begins to Commoditize the Space. Given its increasing importance in the tech stack and its ability to attach to a growing environment, the Observability market attracts new and existing vendors. This can cause pricing and differentiation to erode faster than we expect as large platform vendors (i.e., hyperscalers) continue to push deeper into the stack with bundled offerings and aggressive discounting, while previously adjacent vendors like Snowflake and Palo Alto Networks enter the market via acquisition. In addition, as core capabilities (metrics/logs/traces) become “table stakes” across more vendors, customers may optimize primarily for cost, pressuring Datadog's net expansion, deal sizes, and long-term margins. In that scenario, consolidation benefits may still exist, but value capture could shift toward vendors with the strongest bundling leverage or the lowest effective price.

2) OpenAI Could Prove a Multi-Year Headwind. The timing and magnitude of OpenAI's churn away from Datadog in favor of an internally developed solution remains unclear, but given that today it represents ~10% of the business its drag of overall growth can prove meaningful. While we think there is risk to 2026 estimates given in part to their renewed deal on better unit economics, if OpenAI chooses to churn more aggressively in 2027 there could be greater risk to our forecast.

3) Competition From AI-Native Startups. AI-native startups could potentially win the next generation of customers by building purpose-built observability workflows for modern AI stacks (LLM apps, inference pipelines, vector databases, GPUs) that outperform generalist platforms on time-to-value. If these entrants become the default telemetry

layer for AI-native teams and then expand outward into broader observability/security over time, Datadog could face a share market pressure. The risk is less about immediate displacement in large enterprises and more about losing mindshare and wallet share in the cohort that could become tomorrow's large-scale customers.

Valuation and Comparables

Upgrading to Overweight from Equal-weight; Maintaining our \$180 PT. At current levels against consensus estimates, Datadog trades 8.5x CY27 sales, or 0.41x adjusted for CY25e-'27e revenue growth. Looking at FCF, shares trade at 31x EV/CY27 FCF or 1.2x adjusted for growth. This represents a discount to peers trading at a CY27 Sales median of 9.7x (0.51x growth-adj) and 38x CY27 FCF (1.37x growth-adj). To arrive at our \$180 price target we apply a 46x multiple (1.5x growth-adj) to our CY28 FCF per share estimate of \$4.09, discount it back one year at an ~11% CAGR, and add back \$12 of net cash per share. This 46x FCF/sh multiple (1.5x growth-adjusted) represents a premium to peers trading at a mean/median of 38x/41x CY27 FCF and 1.4x/1.3x adjusted for growth (see [Exhibit 4](#)). We believe a premium is warranted given its status as the leading share gainer in a large category, its highly efficient business model, and being the most innovative company in the Observability space, together translating into durable 25% FCF growth.

Assessing Risk to Initial FY26 Guidance

Initial 2026 Guidance Represents a Near-term Risk Which We Have Factored Into Our 2026 Estimates. While we believe Datadog's revenue growth ex OpenAI is accelerating – we estimate ex-OAI growth accelerated to 22% in 3Q25 from +20% in 2Q25 and we expect further improvement into the low 20% in 4Q25 – we believe there is risk to initial 2026 revenue and operating margin guidance. Our view is that OpenAI, which we estimate is just under a 10% customer, is in the process of diversifying away from Datadog and is past its peak in terms of revenue contribution. To that end our 2026 estimates assume: 1) flat OpenAI revenue dollars compared to 2025 (\$274 million or 0% growth) and 2) core revenue ex OpenAI growth of ~18.5% to account for typical conservatism on the initial guide. This implies total revenue growth of +17% and operating margin of 20% – both below consensus looking for +21% revenue growth and 23% operating margin. Should our estimates prove correct in terms of the initial outlook for 2026, we think stock will react negatively. **However, we think such a scenario would represent a clearing event for the stock as we believe the market will place more weight on the improving underlying growth trends ex OpenAI and we believe that a full churn of OpenAI is unlikely, with exposure to the company gradually getting smaller as the business scales at a rapid clip.**

For more details read our report [Assessing the Risk to 2026 Guidance](#)

Exhibit 7: FY26 consensus revenue implies \$679M of NNRev YoY, an 8% discount vs the beat-adjusted FY25 NNRev of \$740M, which **appears achievable** when compared to the average 7% discount implied by the prior two years' guidance.

Source: Company data, Visible Alpha consensus, Morgan Stanley Research estimates

Exhibit 9: Assuming F1Q26 revenue guide implies flat QoQ growth (2yr ave) and represents 23.1% of the FY guide (2yr ave) yields a **plausible initial FY26 guide of \$4,119M (+20% YoY)**, ~1pt below cons. +21% but 0.4% above \$4,103M.

Source: Company data, Visible Alpha consensus, Morgan Stanley Research estimates

Exhibit 8: FY26 consensus revenue growth of +21% implies 8pts deceleration vs a beat-adjusted Q4 exit growth rate of +29%, which **appears achievable** when compared to the average 6pt deceleration implied by the prior two years' guidance.

Source: Company data, Visible Alpha consensus, Morgan Stanley Research estimates

Exhibit 10: FY25 RPO consensus estimate represents 74% of FY26 revenue consensus estimate, a **favorable uptick** vs the average 72% coverage implied by the prior two years' guidance vs reported RPO.

Risk Reward – Datadog, Inc. (DDOG.O)

Core Growth Improves as Digital & Cloud Migration Initiatives Return

PRICE TARGET \$180.00

Apply a 46x multiple (1.5x growth-adjusted) to our CY28 FCF/share estimate of \$4.09 (\$1.57 billion FCF, 27% margin), and discount back 1yr. 1.5x FCF growth-adj represents a premium to peer average 1.4x CY27. We believe a premium is warranted given it's the leading share gainer in a large category, its highly efficient business model, and being the most innovative company in the observability space, together translating into durable 25% FCF growth

Consensus Price Target Distribution

Source: Refinitiv, Morgan Stanley Research

OVERWEIGHT THESIS

Leading Product in a Growing Market Supports Continued Rapid Growth. Datadog has positioned itself as the leading observability platform for the most modern cloud environments. Strong secular tailwinds towards modern performance monitoring with the re-platforming to the cloud creates an underpenetrated TAM that we estimate at \$90+ billion today

Consensus Rating Distribution

RISK REWARD CHART AND OPTIONS IMPLIED PROBABILITIES (12M)

Key: — Historical Stock Performance ● Current Stock Price ◆ Price Target

Source: Refinitiv, Morgan Stanley Research, Morgan Stanley Institutional Equities Division. The probabilities of our Bull, Base, and Bear case scenarios playing out were estimated with implied volatility data from the options market as of 9 Jan 2026. All figures are approximate risk-neutral probabilities of the stock reaching beyond the scenario price in either three-months' or one-years' time. View explanation of Options Probabilities methodology [here](#)

BULL CASE

\$280.00

61x CY28e FCF/sh of \$4.89, discounted back 1yr.

Datadog Becomes The Consolidation Vendor in The Observability Market, While Security and ITSM Expansion Ramps. We assume that Datadog grows total revenue at a ~25% 4-yr revenue CAGR through CY28 to \$6.6B while operating margins improve to 27%, yielding \$1.89B of FCF (29% margin) or \$4.89/share. Applying 61x multiple to CY28 FCF/sh (2.2x growth-adjusted) and discounting back 1yr at ~11% WACC yields \$280.

BASE CASE

\$180.00

46x CY28e FCF/sh of \$4.09, discounted back 1yr

Continued Leading Position in Observability Combined with Superior Unit Economics Drive Strong FCF. We assume that Datadog grows total revenue at a ~22% 4-yr revenue CAGR through CY28 to \$5.9B while operating margins maintains at 25%, yielding \$1.57B of FCF (27% margin) or \$4.09/share. Applying 46x multiple to CY28 FCF/sh (1.5x growth-adjusted) and discounting back 1yr at ~11% WACC yields our price target of \$180. 1.5x represents a modest premium to its peer group average of 1.4x.

BEAR CASE

\$87.00

26x CY27e FCF/sh of \$3.28, discounted back 1yr.

Intensifying Competition Weighs on Growth and Margins. We assume that Datadog grows total revenue at a ~17% 4-yr revenue CAGR through CY28 to \$5.1B while operating margins deteriorates to 23%, yielding \$1.26B of FCF (25% margin) or \$3.28/share. Applying 26x multiple to CY28 FCF/sh (1x growth-adjusted) and discounting back 1yr at ~11% WACC yields \$87.

RISKS TO PT/RATING

RISKS TO UPSIDE

- Customers consolidate capabilities with the Datadog platform
- Stronger Uptake of newer products
- Better Growth translates to margin outperformance
- OpenAI consumption proves stronger than expected

RISKS TO DOWNSIDE

- Intensifying competition in a crowded market
- OpenAI churns faster than expected
- Weak adoption outside of Observability
- Premium pricing causes customer to move to alternatives

OWNERSHIP POSITIONING

Wix.Com Ltd, Workday Inc, Zoom Communications, Zscaler Inc.

An employee, director or consultant of Morgan Stanley is a director of Elastic NV, Tenable Holdings Inc. This person is not a research analyst or a member of a research analyst's household. Morgan Stanley & Co. LLC makes a market in the securities of Amplitude Inc., Appian Corp, Asana Inc, Blackline Inc, Box Inc, Commerce.com Inc., Coursera, Inc., CyberArk Software Ltd, Five9 Inc, Freshworks Inc, GoDaddy Inc, Jamf Holding Corp, JFrog Ltd., Klaviyo, Inc, LegalZoom.com Inc, Liveramp Holdings Inc, Manhattan Associates Inc., PagerDuty, Inc., Qualys Inc, Rapid7 Inc, RingCentral Inc, Semrush Holdings Inc -A, Sprinklr Inc, Sprout Social Inc, SPS Commerce Inc, Tenable Holdings Inc, Udemy Inc, Varonis Systems, Inc., Vertex Inc., Wix.Com Ltd, ZoomInfo Technologies Inc.

The equity research analysts or strategists principally responsible for the preparation of Morgan Stanley Research have received compensation based upon various factors, including quality of research, investor client feedback, stock picking, competitive factors, firm revenues and overall investment banking revenues. Equity Research analysts' or strategists' compensation is not linked to investment banking or capital markets transactions performed by Morgan Stanley or the profitability or revenues of particular trading desks.

Morgan Stanley and its affiliates do business that relates to companies/instruments covered in Morgan Stanley Research, including market making, providing liquidity, fund management, commercial banking, extension of credit, investment services and investment banking. Morgan Stanley sells to and buys from customers the securities/instruments of companies covered in Morgan Stanley Research on a principal basis. Morgan Stanley may have a position in the debt of the Company or instruments discussed in this report. Morgan Stanley trades or may trade as principal in the debt securities (or in related derivatives) that are the subject of the debt research report.

Certain disclosures listed above are also for compliance with applicable regulations in non-US jurisdictions.

STOCK RATINGS

Morgan Stanley uses a relative rating system using terms such as Overweight, Equal-weight, Not-Rated or Underweight (see definitions below). Morgan Stanley does not assign ratings of Buy, Hold or Sell to the stocks we cover. Overweight, Equal-weight, Not-Rated and Underweight are not the equivalent of buy, hold and sell. Investors should carefully read the definitions of all ratings used in Morgan Stanley Research. In addition, since Morgan Stanley Research contains more complete information concerning the analyst's views, investors should carefully read Morgan Stanley Research, in its entirety, and not infer the contents from the rating alone. In any case, ratings (or research) should not be used or relied upon as investment advice. An investor's decision to buy or sell a stock should depend on individual circumstances (such as the investor's existing holdings) and other considerations.

Global Stock Ratings Distribution

(as of December 31, 2025)

The Stock Ratings described below apply to Morgan Stanley's Fundamental Equity Research and do not apply to Debt Research produced by the Firm.

For disclosure purposes only (in accordance with FINRA requirements), we include the category headings of Buy, Hold, and Sell alongside our ratings of Overweight, Equal-weight, Not-Rated and Underweight. Morgan Stanley does not assign ratings of Buy, Hold or Sell to the stocks we cover. Overweight, Equal-weight, Not-Rated and Underweight are not the equivalent of buy, hold, and sell but represent recommended relative weightings (see definitions below). To satisfy regulatory requirements, we correspond Overweight, our most positive stock rating, with a buy recommendation; we correspond Equal-weight and Not-Rated to hold and Underweight to sell recommendations, respectively.

Stock Rating Category	Coverage Universe		Investment Banking Clients (IBC)			Other Material Investment Services Clients (MISC)	
	Count	% of Total	Count	% of Total IBC	% of Rating Category	Count	% of Total Other MISC
Overweight/Buy	1519	41%	415	48%	27%	674	42%
Equal-weight/Hold	1583	43%	362	42%	23%	720	45%
Not-Rated/Hold	4	0%	1	0%	25%	1	0%
Underweight/Sell	564	15%	87	10%	15%	216	13%
Total	3,670		865			1611	

Data include common stock and ADRs currently assigned ratings. Investment Banking Clients are companies from whom Morgan Stanley received investment banking compensation in the last 12 months. Due to rounding off of decimals, the percentages provided in the "% of total" column may not add up to exactly 100 percent.

Analyst Stock Ratings

Overweight (O). The stock's total return is expected to exceed the average total return of the analyst's industry (or industry team's) coverage universe, on a risk-adjusted basis, over the next 12-18 months.

Equal-weight (E). The stock's total return is expected to be in line with the average total return of the analyst's industry (or industry team's) coverage universe, on a risk-adjusted basis, over the next 12-18 months.

Not-Rated (NR). Currently the analyst does not have adequate conviction about the stock's total return relative to the average total return of the analyst's industry (or industry team's) coverage universe, on a risk-adjusted basis, over the next 12-18 months.

Underweight (U). The stock's total return is expected to be below the average total return of the analyst's industry (or industry team's) coverage universe, on a risk-adjusted basis, over the next 12-18 months.

Unless otherwise specified, the time frame for price targets included in Morgan Stanley Research is 12 to 18 months.

Analyst Industry Views

Attractive (A): The analyst expects the performance of his or her industry coverage universe over the next 12-18 months to be attractive vs. the relevant broad market benchmark, as indicated below.

Important Disclosures for Morgan Stanley Smith Barney LLC Customers

Important disclosures regarding any material conflict of interest that can reasonably be expected to have influenced Morgan Stanley Smith Barney LLC's choice of a third-party research provider or the subject company of a third-party research report, are available on the Morgan Stanley Wealth Management disclosure website at www.morganstanley.com/online/researchdisclosures. For Morgan Stanley specific disclosures, you may refer to <https://www.morganstanley.com/eqr/disclosures/webapp/generalresearch>.

Each Morgan Stanley research report is reviewed and approved on behalf of Morgan Stanley Smith Barney LLC. This review and approval is conducted by the same person who reviews the research report on behalf of Morgan Stanley. This could create a conflict of interest.

Other Important Disclosures

A member of Research who had or could have had access to the research prior to completion owns securities (or related derivatives) in the Atlassian Corporation PLC, Microsoft, Workday Inc. This person is not a research analyst or a member of research analyst's household.

Morgan Stanley Research policy is to update research reports as and when the Research Analyst and Research Management deem appropriate, based on developments with the issuer, the sector, or the market that may have a material impact on the research views or opinions stated therein. In addition, certain Research publications are intended to be updated on a regular periodic basis (weekly/monthly/quarterly/annual) and will ordinarily be updated with that frequency, unless the Research Analyst and Research Management determine that a different publication schedule is appropriate based on current conditions.

Morgan Stanley is not acting as a municipal advisor and the opinions or views contained herein are not intended to be, and do not constitute, advice within the meaning of Section 975 of the Dodd-Frank Wall Street Reform and Consumer Protection Act.

Morgan Stanley produces an equity research product called a "Tactical Idea." Views contained in a "Tactical Idea" on a particular stock may be contrary to the recommendations or views expressed in research on the same stock. This may be the result of differing time horizons, methodologies, market events, or other factors. For all research available on a particular stock, please contact your sales representative or go to Matrix at <http://www.morganstanley.com/matrix>.

Morgan Stanley Research is provided to our clients through our proprietary research portal on Matrix and also distributed electronically by Morgan Stanley to clients. Certain, but not all, Morgan Stanley Research products are also made available to clients through third-party vendors or redistributed to clients through alternate electronic means as a convenience. For access to all available Morgan Stanley Research, please contact your sales representative or go to Matrix at <http://www.morganstanley.com/matrix>.

Any access and/or use of Morgan Stanley Research is subject to Morgan Stanley's Terms of Use (<http://www.morganstanley.com/terms.html>). By accessing and/or using Morgan Stanley Research, you are indicating that you have read and agree to be bound by our Terms of Use (<http://www.morganstanley.com/terms.html>). In addition you consent to Morgan Stanley processing your personal data and using cookies in accordance with our Privacy Policy and our Global Cookies Policy (http://www.morganstanley.com/privacy_pledge.html), including for the purposes of setting your preferences and to collect readership data so that we can deliver better and more personalized service and products to you. To find out more information about how Morgan Stanley processes personal data, how we use cookies and how to reject cookies see our Privacy Policy and our Global Cookies Policy (http://www.morganstanley.com/privacy_pledge.html). Research_Audit_Report.pdf).

If you do not agree to our Terms of Use and/or if you do not wish to provide your consent to Morgan Stanley processing your personal data or using cookies please do not access our research. Morgan Stanley Research does not provide individually tailored investment advice. Morgan Stanley Research has been prepared without regard to the circumstances and objectives of those who receive it. Morgan Stanley recommends that investors independently evaluate particular investments and strategies, and encourages investors to seek the advice of a financial adviser. The appropriateness of an investment or strategy will depend on an investor's circumstances and objectives. The securities, instruments, or strategies discussed in Morgan Stanley Research may not be suitable for all investors, and certain investors may not be eligible to purchase or participate in some or all of them. Morgan Stanley Research is not an offer to buy or sell or the solicitation of an offer to buy or sell any security/instrument or to participate in any particular trading strategy. The value of and income from your investments may vary because of changes in interest rates, foreign exchange rates, default rates, prepayment rates, securities/instruments prices, market indexes, operational or financial conditions of companies or other factors. There may be time limitations on the exercise of options or other rights in securities/instruments transactions. Past performance is not necessarily a guide to future performance. Estimates of future performance are based on assumptions that may not be realized. If provided, and unless otherwise stated, the closing price on the cover page is that of the primary exchange for the subject company's securities/instruments.

The fixed income research analysts, strategists or economists principally responsible for the preparation of Morgan Stanley Research have received compensation based upon various factors, including quality, accuracy and value of research, firm profitability or revenues (which include fixed income trading and capital markets profitability or revenues), client feedback and competitive factors. Fixed Income Research analysts', strategists' or economists' compensation is not linked to investment banking or capital markets transactions performed by Morgan Stanley or the profitability or revenues of particular trading desks.

The "Important Regulatory Disclosures on Subject Companies" section in Morgan Stanley Research lists all companies mentioned where Morgan Stanley owns 1% or more of a class of common equity securities of the companies. For all other companies mentioned in Morgan Stanley Research, Morgan Stanley may have an investment of less than 1% in securities/instruments or derivatives of securities/instruments of companies and may trade them in ways different from those discussed in Morgan Stanley Research. Employees of Morgan Stanley not involved in the preparation of Morgan Stanley Research may have investments in securities/instruments or derivatives of securities/instruments of companies mentioned and may trade them in ways different from those discussed in Morgan Stanley Research. Derivatives may be issued by Morgan Stanley or associated persons.

With the exception of information regarding Morgan Stanley, Morgan Stanley Research is based on public information. Morgan Stanley makes every effort to use reliable, comprehensive information, but we make no representation that it is accurate or complete. We have no obligation to tell you when opinions or information in Morgan Stanley Research change apart from when we intend to discontinue equity research coverage of a subject company. Facts and views presented in Morgan Stanley Research have not been reviewed by, and may not reflect information known to, professionals in other Morgan Stanley business areas, including investment banking personnel.

Morgan Stanley Research personnel may participate in company events such as site visits and are generally prohibited from accepting payment by the company of associated expenses unless pre-approved by authorized members of Research management.

Morgan Stanley may make investment decisions that are inconsistent with the recommendations or views in this report.

To our readers based in Taiwan or trading in Taiwan securities/instruments: Information on securities/instruments that trade in Taiwan is distributed by Morgan Stanley Taiwan Limited ("MSTL"). Such information is for your reference only. The reader should independently evaluate the investment risks and is solely responsible for their investment decisions. Morgan Stanley Research may not be distributed to the public media or quoted or used by the public media without the express written consent of Morgan Stanley. Any non-customer reader within the scope of Article 7-1 of the Taiwan Stock Exchange Recommendation Regulations accessing and/or receiving Morgan Stanley Research is not permitted to provide Morgan Stanley Research to any third party (including but not limited to related parties, affiliated companies and any other third parties) or engage in any activities regarding Morgan Stanley Research which may create or give the appearance of creating a conflict of interest. Information on securities/instruments that do not trade in Taiwan is for informational purposes only and is not to be construed as a recommendation or a solicitation to trade in such securities/instruments. MSTL may not execute transactions for clients in these securities/instruments.
