

Datadog

Best in Show; Record Q4 Execution and Broadening Growth Represent a Bright Spot in a Clouded Software Landscape

As a reminder, our preview (note [here](#)) was positively biased heading into the print, anchored by broad observability demand drivers including cloud migration, AI-driven code velocity, and expanding workload complexity, reinforced by directionally positive channel checks (see [here](#) and [here](#)). We see that translating clearly into Datadog's Q4 results, which represent a robust finish to the year on virtually every dimension. Among the most notable disclosures: *two deals exceeding \$100M in TCV, a milestone very few software companies will ever reach, and an 8-figure (i.e., \$10M-\$99M) new land with one of the largest AI model providers*, important in our view whether it be Anthropic (very possible in our view) or another large AI model provider, reinforcing Datadog's positioning as the default observability platform for frontier AI companies. Beyond the headline deal activity, the company is *clearly winning on multiple fronts*: core APM is growing in the mid-30s, *the broader base of customers excluding AI-natives accelerates to 23% growth*, and the AI-native cohort continues to broaden with 650 customers and 19 spending \$1M+ annually. Regarding guidance, *we view the initial FY26 framework of 19.1% revenue growth as more than sufficient: it is technically a half-point stronger than last year's initial guidance of ~18.7% despite fighting the law of large numbers and tougher comps*, and the company is calling for 20%+ growth across the broader base of customers excluding the largest customer, which we see as checking every bullish box. Key Takeaways: **1) Strong Q4 Beat with Third Consecutive Quarter of Revenue Acceleration and Record Bookings.** Q4 total revenue growth of +29.2% y/y lands well above Street consensus by ~4.9 percentage points and 5.3 percentage points above the midpoint of guidance, marking a third consecutive quarter of meaningful outperformance and a *further acceleration* from +28.4% in Q3 and +28.1% in Q2. The upside reflects broad-based usage acceleration across both AI-native and non-AI customers, with revenue growth from the non-AI cohort accelerating to 23% y/y (from 20% in Q3), the strongest level in over a year, while AI-native customers continue to grow at rates that significantly outpace the broader business (more below). Go-to-market execution was exceptional, with record bookings of \$1.63B (+37% y/y), including 18 deals over \$10M TCV (2 over \$100M), and record new logo conversions with growing average land sizes. Q4 PF operating income of \$230.1M (24.1% margin) exceeds Street of \$220.7M (St. 24.1%), with the beat driven primarily by the revenue upside. Billings growth accelerates to +34% y/y (from +30% in Q3), while RPO increases +52% y/y to \$3.46B, with current RPO growth of ~40% y/y, both highlighting durable demand visibility and increasing multiyear deal mix that extends average contract duration, although RPO and cRPO both represent a deceleration from last quarter's exceptional rates. Free cash flow of \$291M (30.5% margin) comes in ahead of Street at \$258M (St. 28.1%). On product metrics, Datadog ended Q4 with ~32,700 total customers (+9% y/y), ~4,310 \$100K+ customers (+19% y/y) driving ~90% of ARR, and 603 \$1M+ ARR customers

Summary Investment Thesis and Valuation

Investment Thesis

Datadog is a leading provider of monitoring and security for public cloud, private cloud, and on-premises applications, with these solutions delivered via a comprehensive, unified platform. The company's technologies integrate and automate infrastructure monitoring, application performance monitoring, and log management to enable seamless observability, cloud security, and developer use cases. The company sees a large portion of the ITOM market as its target, which Gartner estimates will represent a \$53B opportunity by 2025. The combination of its large market opportunity, along with rapid growth, positive PF operating margin, and FCF generation, put it in an elite category. This market includes both legacy on-premise and private cloud environments as well as modern public cloud environments, which are expected to grow faster than the ITOM market as a whole. While the legacy environments include more competitive displacements, the cloud infrastructure space is primarily greenfield. We believe Datadog is the leader in its market and the preferred tool among DevOps professionals, providing a single-pane-of-glass experience across dynamic operating environments. As a result, we see Datadog as a direct beneficiary of the secular trends of digital transformation, which is driving an increase in workloads, as well as cloud migration, which is driving a higher proportion of workloads to public clouds, positioning it well in the drive toward modernization.

(+31% y/y from 462). Product breadth continues to expand as 84% of customers use ≥ 2 products, 55% ≥ 4 , 33% ≥ 6 , 18% ≥ 8 , and 9% ≥ 10 , all up meaningfully y/y. The three core pillars each reached significant ARR milestones: Infrastructure Monitoring $> \$1.6B$, Log Management $> \$1B$ (with Flex Logs nearing \$100M), and APM + DEM crossing \$1B, with core APM reaccelerating to mid-30% y/y growth, now the fastest-growing pillar. **2) As Expected, FY26 Total Revenue Growth Guidance Comes in Below Street Consensus, Though Q1 Guidance is Notably Strong.** At the midpoint, FY26 guidance for total revenue is \$4,080M or 19.1% y/y vs. Street consensus of \$4,106.9M or 21.1% y/y, as a consequence of the Q4 upside; PF operating income is \$860M or 21.1% margin vs. Street consensus of \$958.6M or 23.3% margin; and PF EPS is \$2.12 vs. Street consensus of \$2.41. In our preview, we wrote that we "fully expect Datadog to follow its well-established pattern of conservative first-blush FY guidance" and noted that bears were expecting 13-15% FY26 growth guidance while bulls were closer to 17-20%, with Street consensus at ~21%. Datadog's initial FY26 guide of 19.1% lands squarely in the bull camp, in our view, and well above the bear-case scenario, which we view as a positive signal on the company's underlying confidence. For context, Datadog guided FY25 to just 18.7% growth at the start of last year and ultimately delivered 27.7% for the full year (\$3,427M vs. initial guide of \$3,185M at the midpoint), a ~\$242M or ~900bps raise over the course of the year that underscores the significant prudence historically embedded in the first-blush outlook. Importantly, Datadog explicitly states that the FY26 guidance models the business, excluding the largest customer, growing at least 20%, implying conservative assumptions around the largest AI customer, which it describes as reflective of a consumption model where "we essentially don't control that" rather than any indication of slowing. Our understanding is the guidance philosophy is the same as prior years: plan with conservative revenues, invest first in growth, and layer in additional investment as performance exceeds targets. Additionally, the company expects gross margins at approximately 80%, capex plus capitalized software at 4-5% of revenue, net interest and other income of ~\$140M, and cash taxes of \$30-40M. Note that Datadog is guiding to a very similar initial CY26 operating margin (+21.1%) as where its guidance began for CY25 (~+20.9%), consistent with the approach of reinvesting upside into R&D and go-to-market capacity while allowing margin to expand as the year progresses. In contrast, Q1 guidance is notably strong, with revenue of \$956M at the midpoint implying 25.5% y/y growth and landing +2.6 percentage points above Street consensus of \$935.9M, consistent with Datadog's comment on the earnings calls that the trend of accelerating broad-based revenue growth has continued into January. The Q1 guidance comes in 1.6% points above the initial Q4 guidance and potentially sets up a familiar cadence of conservative full-year guidance paired with strong near-term execution visibility. **3) AI-Native Cohort Broadens and Diversifies; Largest Customer Dynamic Shifts from Renewal Risk to Guidance Conservatism.** The AI-native customer group continues to expand rapidly, with Datadog now serving ~650 AI-native companies (up from 500+ in Q3), including 19 spending \$1M+ annually (up from 15 in Q3) and 14 of the top 20 AI-native companies as customers. Go-to-market momentum within this cohort was highlighted by an 8-figure annualized new land with one of the largest AI model companies, which we think is worth consideration of potentially being Anthropic, which was a consolidation of more than 5 open-source, commercial, hyperscaler, and in-house observability tools, representing another major AI model provider contract following the OpenAI renewal last quarter and reinforces Datadog's positioning as the default observability platform for frontier AI companies. On the largest customer, the narrative has evolved from renewal risk (addressed last quarter) to guidance conservatism, with the FY26 guidance embedding conservative assumptions around this customer's growth trajectory. We view this framing as prudent and consistent with Datadog's historical guidance philosophy, while the underlying signal, that the highly diversified ~650-name AI cohort continues to grow at rates that significantly outpace the broader business, is the more important takeaway. On the product side, AI observability capabilities continue to gain traction, with over 5,500 customers now using one or more Datadog AI integrations (up from 5,000+ in Q3), LLM Observability adoption exceeding 1,000 customers with spans

increasing 10x over the past six months, and explosive growth in the Datadog MCP Server product with tool calls growing 11x quarter-over-quarter. Over 2,000 trial and paying customers ran Bits AI SRE agent investigations in the past month, an early but encouraging engagement signal. On the call, the company notes that Datadog's long-term AI moat lies not in post-hoc LLM analysis but in real-time, in-stream detection and pre-remediation across orders of magnitude more data, embedded directly in the data plane, a capability it describes as "significantly different" from what general-purpose AI platforms can deliver and one that positions Datadog to capture value as observability evolves from reactive incident response to proactive, automated resolution. **4) Core Business Reacceleration is the Headline Story, Supported by Record GTM Execution and Broad-Based Strength.** The acceleration in non-AI-native revenue growth noted above was broad-based across customer size, spending bands, and industries, and Datadog notes this trend of acceleration has continued into January, providing confidence that the improvement is a helpful indication that 2026 is starting out with signs of consistent positive trending. The reacceleration reflects the full ramping of prior go-to-market investments, with the company noting the focus is now on "scaling while maintaining productivity" as it is "not at the scale we need to be in every single market segment in the world right now," suggesting further capacity additions ahead. In log management specifically, Datadog displaces legacy vendors in nearly 100 deals for tens of millions of dollars of new revenue during 2025, reinforcing the consolidation motion. On the product side, core APM's reacceleration to mid-30% y/y growth is particularly notable given it is Datadog's most deeply deployed product and historically its steadiest grower; the company attributes the inflection to simplified onboarding, differentiated digital experience capabilities driving broader suite adoption, and improved go-to-market coverage globally, while noting it still has "a small part of the pure APM market" in a TAM it sizes at ~\$10B+. About half of customers still do not buy all three core pillars, leaving substantial cross-sell runway. Fortune 500 penetration reached 48%, but with median ARR still below \$500K, the whitespace within existing large enterprise accounts remains significant. Gross revenue retention remains stable in the mid-to-high 90s, and trailing 12-month net dollar-based retention held at ~120% for the third consecutive quarter, reflecting durable expansion dynamics across the installed base. *Net/net: We see Datadog as a vibrant category leader in a market that is benefiting from the relentless modernization trend, along with a highly attractive financial profile and history of execution. However, we maintain a balanced view on the uncertain macroeconomic and geopolitical environment. Datadog's shares trade at a premium revenue multiple and FCF multiple, which we think is justified to some extent given the long-term scaling of the business with superb efficiency and its strong positioning within an attractive market benefiting from digital transformation and cloud migration. Remain OW; Dec-26 PT of \$200.*

Investment Thesis, Valuation and Risks

Datadog (*Overweight; Price Target: \$200.00*)

Investment Thesis

Datadog is a leading provider of monitoring and security for public cloud, private cloud, and on-premises applications, with these solutions delivered via a comprehensive, unified platform. The company's technologies integrate and automate infrastructure monitoring, application performance monitoring, and log management to enable seamless observability, cloud security, and developer use-cases. The company sees a large portion of IT Operations Management as its target market, which Gartner estimates will represent a \$53B opportunity by 2025. The combination of its large market opportunity, along with rapid growth, positive PF operating margin, and cash flow generation, put it in an elite category. This market includes both legacy on-premise and private cloud environments as well as modern public cloud environments, including multi- and hybrid-cloud, which are expected to grow faster than the IT Operations Management market as a whole. While the legacy environments include more competitive displacements, the cloud infrastructure space is primarily greenfield. We believe Datadog is the leader in its market and the preferred tool by DevOps professionals, providing a single-pane-of-glass experience across numerous and dynamic operating environments. As a result, we see Datadog as a direct beneficiary of the secular trends of digital transformation, which is driving an increase in workloads overall, as well as cloud migration, which is driving a higher proportion of workloads to public clouds, positioning it well in the drive toward modernization.

Valuation

We are rolling forward our valuation basis from CY26 to CY27. Our \$200 Dec-26 PT is based on ~50x EV/CY27E uFCF using \$1.4B of uFCF for CY27E. Our multiple for DDOG shares is at a slight premium to the Fast-Growing Infrastructure Software Vendors comp set, which trades at ~48x on average. We believe Datadog's multiple is warranted given its category leadership, multiple vectors of growth, benefit from ongoing cloud migrations, and AI-related tailwinds, offset by its usage-based model, which can exhibit greater volatility than other business models.

Risks to Rating and Price Target

Risks to the Downside

- **Native Hypercloud DevOps Tools.** While there are various public cloud options, the market is currently dominated by Amazon's Amazon Web Services (AWS), Microsoft's Azure, and Google's Google Cloud Platform (GCP) platforms. These platforms feature native DevOps observability and security tools that compete with Datadog. Should these services become more attractive and/or cost competitive for customers, the company may face increased competition and price pressure, potentially impacting growth and profitability.
- **Acute Execution Risk.** Datadog has grown rapidly, both in terms of revenue and head count, increasing head count 156% in 2020 compared with 2019 and 147% in 2021 compared with 2020. As a result, maintaining the company's growth curve requires excellent execution and ramping of sales reps as it supports its best-in-class sales efficiency. While the company has a history of excellent execution, should any challenges emerge in its execution, growth and margins will likely suffer and investor sentiment erode, likely resulting in deceleration and multiple contraction.

- **Macroeconomic Gyration.** Recent macroeconomic uncertainties have caused many IT customers to scrutinize deals more carefully, defer modernization products, and/or optimize or reduce spending. Should the environment worsen and customers further defer or reduce IT spending, Datadog's growth curve may be negatively impacted, with the company potentially particularly affected given its exposure to SMB customers.

Each Gartner publication speaks as of its original publication date (and not as of the date of this presentation or report). The opinions expressed in Gartner publications are not representations of fact and are subject to change without notice.

Company-Specific Disclosures: Important disclosures, including price charts and credit opinion history tables (if applicable), are available for compendium reports and all J.P. Morgan-covered companies, and certain non-covered companies, by visiting <https://www.jpmm.com/research/disclosures>, calling 1-800-477-0406, or e-mailing research.disclosure.inquiries@jpmorgan.com with your request.

Datadog (DDOG, DDOG US) Price Chart

Date	Rating	Price (\$)	Price Target (\$)
08-Aug-23	N	106.30	90
07-Nov-23	OW	79.55	115
13-Feb-24	OW	134.85	140
06-Nov-25	OW	154.98	200

Source: Bloomberg Finance L.P. and J.P. Morgan; price data adjusted for stock splits and dividends.
Initiated coverage Oct 14, 2019. All share prices are as of market close on the previous business day.

The chart(s) show J.P. Morgan's continuing coverage of the stocks; the current analysts may or may not have covered it over the entire period. J.P. Morgan ratings or designations: OW = Overweight, N= Neutral, UW = Underweight, NR = Not Rated

Explanation of Equity Research Ratings, Designations and Analyst(s) Coverage Universe:

J.P. Morgan uses the following rating system: Overweight (over the duration of the price target indicated in this report, we expect this stock will outperform the average total return of the stocks in the Research Analyst's, or the Research Analyst's team's, coverage universe); Neutral (over the duration of the price target indicated in this report, we expect this stock will perform in line with the average total return of the stocks in the Research Analyst's, or the Research Analyst's team's, coverage universe); and Underweight (over the duration of the price target indicated in this report, we expect this stock will underperform the average total return of the stocks in the Research Analyst's, or the Research Analyst's team's, coverage universe. NR is Not Rated. In this case, J.P. Morgan has removed the rating and, if applicable, the price target, for this stock because of either a lack of a sufficient fundamental basis or for legal, regulatory or policy reasons. The previous rating and, if applicable, the price target, no longer should be relied upon. An NR designation is not a recommendation or a rating. Some stocks under coverage have a rating but no price target; in these cases, we expect the stock will outperform/perform in line/underperform the average total return of the stocks in the Research Analyst's, or the Research Analyst's team's, coverage universe of the relevant duration of the region. In our Asia (ex-Australia and ex-India) and U.K. small- and mid-cap Equity Research, each stock's expected total return is compared to the expected total return of a benchmark country market index, not to those Research Analysts' coverage universe. If it does not appear in the Important Disclosures section of this report, the certifying Research Analyst's coverage universe can be found on J.P. Morgan's Research website, <https://www.jpmorganmarkets.com>.

Coverage Universe: Murphy, Mark R: Adobe Inc (ADBE), Akamai Technologies, Inc. (AKAM), Cloudflare (NET), Confluent (CFLT), CoreWeave (CRWV), Datadog (DDOG), DocuSign (DOCU), DoubleVerify (DV), Dropbox (DBX), Dynatrace (DT), Figma (FIG), HubSpot (HUBS), Intuit (INTU), Microsoft (MSFT), Monday.com (MNDY), OneStream (OS), Oracle (ORCL), Paycom (PAYC), Salesforce Inc (CRM), ServiceNow (NOW), Snowflake (SNOW), Twilio (TWLO), Workday (WDAY), Zoom Video (ZM), ZoomInfo (GTM)

J.P. Morgan Equity Research Ratings Distribution, as of January 01, 2026

	Overweight (buy)	Neutral (hold)	Underweight (sell)
J.P. Morgan Global Equity Research Coverage*	51%	37%	12%
IB clients**	47%	47%	35%
JPMS Equity Research Coverage*	49%	38%	13%
IB clients**	72%	70%	53%

*Please note that the percentages may not add to 100% because of rounding.

**Percentage of subject companies within each of the "buy," "hold" and "sell" categories for which J.P. Morgan has provided investment banking services within the previous 12 months.

For purposes of FINRA ratings distribution rules only, our Overweight rating falls into a buy rating category; our Neutral rating falls into a hold rating category; and our Underweight rating falls into a sell rating category. Please note that stocks with an NR designation are not included in the table above. This information is current as of the end of the most recent calendar quarter.

Equity Valuation and Risks: For valuation methodology and risks associated with covered companies or price targets for covered companies, please see the most recent company-specific research report at <http://www.jpmorganmarkets.com>, contact the primary analyst or your J.P. Morgan representative, or email research.disclosure.inquiries@jpmorgan.com. For material information about the proprietary models used, please see the Summary of Financials in company-specific research reports and the Company Tearsheets, which are available to download on

the company pages of our client website, <http://www.jpmorganmarkets.com>. This report also sets out within it the material underlying assumptions used.

History of Investment Recommendations:

A history of J.P. Morgan investment recommendations disseminated during the preceding 12 months can be accessed on the Research & Commentary page of <http://www.jpmorganmarkets.com> where you can also search by analyst name, sector or financial instrument.

Analysts' Compensation: The research analysts responsible for the preparation of this report receive compensation based upon various factors, including the quality and accuracy of research, client feedback, competitive factors, and overall firm revenues.

Other Disclosures

J.P. Morgan is a marketing name for investment banking businesses of JPMorgan Chase & Co. and its subsidiaries and affiliates worldwide.

UK MIFID FICC research unbundling exemption: UK clients should refer to [UK MIFID Research Unbundling exemption](#) for details of J.P. Morgan's implementation of the FICC research exemption and guidance on relevant FICC research categorisation.

All research material made available to clients are simultaneously available on our client website, J.P. Morgan Markets, unless specifically permitted by relevant laws. Not all research content is redistributed, e-mailed or made available to third-party aggregators. For all research material available on a particular stock, please contact your sales representative.

Any long form nomenclature for references to China; Hong Kong; Taiwan; and Macau within this research material are Mainland China; Hong Kong SAR (China); Taiwan (China); and Macau SAR (China).

J.P. Morgan Research may, from time to time, write on issuers or securities targeted by economic or financial sanctions imposed or administered by the governmental authorities of the U.S., EU, UK or other relevant jurisdictions (Sanctioned Securities). Nothing in this report is intended to be read or construed as encouraging, facilitating, promoting or otherwise approving investment or dealing in such Sanctioned Securities. Clients should be aware of their own legal and compliance obligations when making investment decisions.

Any digital or crypto assets discussed in this research report are subject to a rapidly changing regulatory landscape. For relevant regulatory advisories on crypto assets, including bitcoin and ether, please see <https://www.jpmorgan.com/disclosures/cryptoasset-disclosure>.

The author(s) of this research report may not be licensed to carry on regulated activities in your jurisdiction and, if not licensed, do not hold themselves out as being able to do so.

Exchange-Traded Funds (ETFs): J.P. Morgan Securities LLC ("JPMS") acts as authorized participant for substantially all U.S.-listed ETFs. To the extent that any ETFs are mentioned in this report, JPMS may earn commissions and transaction-based compensation in connection with the distribution of those ETF shares and may earn fees for performing other trade-related services, such as securities lending to short sellers of the ETF shares. JPMS may also perform services for the ETFs themselves, including acting as a broker or dealer to the ETFs. In addition, affiliates of JPMS may perform services for the ETFs, including trust, custodial, administration, lending, index calculation and/or maintenance and other services.

Options and Futures related research: If the information contained herein regards options- or futures-related research, such information is available only to persons who have received the proper options or futures risk disclosure documents. Please contact your J.P. Morgan Representative or visit <https://www.theocc.com/components/docs/riskstoc.pdf> for a copy of the Option Clearing Corporation's Characteristics and Risks of Standardized Options or https://www.finra.org/sites/default/files/2020-08/Security_Futures_Risk_Disclosure_Statement_2020.pdf for a copy of the Security Futures Risk Disclosure Statement.

Changes to Interbank Offered Rates (IBORs) and other benchmark rates: Certain interest rate benchmarks are, or may in the future become, subject to ongoing international, national and other regulatory guidance, reform and proposals for reform. For more information, please consult: https://www.jpmorgan.com/global/disclosures/interbank_offered_rates

Private Bank Clients: Where you are receiving research as a client of the private banking businesses offered by JPMorgan Chase & Co. and its subsidiaries ("J.P. Morgan Private Bank"), research is provided to you by J.P. Morgan Private Bank and not by any other division of J.P. Morgan, including, but not limited to, the J.P. Morgan Corporate and Investment Bank and its Global Research division.

Legal entity responsible for the production and distribution of research: The legal entity identified below the name of the Reg AC Research Analyst who authored this material is the legal entity responsible for the production of this research. Where multiple Reg AC Research Analysts authored this material with different legal entities identified below their names, these legal entities are jointly responsible for the production of this research. Where more than one legal entity is listed under an analyst's name, the first legal entity is responsible for the production unless stated otherwise. Research Analysts from various J.P. Morgan affiliates may have contributed to the production of this material but may not be licensed to carry out regulated activities in your jurisdiction (and do not hold themselves out as being able to do so). Unless otherwise stated below in the legal entity disclosures, this material has been distributed by the legal entity responsible for production, or where more than one legal entity is listed under the analyst's name, the first legal entity will be responsible for distribution. If you have any queries, please contact the relevant Research Analyst in your jurisdiction or the entity in your jurisdiction that has distributed this research material.

Morgan Securities plc ("JPMS plc") which is a member of the London Stock Exchange and is authorised by the Prudential Regulation Authority and regulated by the Financial Conduct Authority and the Prudential Regulation Authority or J.P. Morgan Markets Limited ("JPML Ltd") which is authorised and regulated by the Financial Conduct Authority. Unless specified to the contrary, this material is distributed in the UK by JPMS plc and is directed in the UK only to: (a) persons having professional experience in matters relating to investments falling within article 19(5) of the Financial Services and Markets Act 2000 (Financial Promotion) (Order) 2005 ("the FPO"); (b) persons outlined in article 49 of the FPO (high net worth companies, unincorporated associations or partnerships, the trustees of high value trusts, etc.); or (c) any persons to whom this communication may otherwise lawfully be made; all such persons being referred to as "UK relevant persons". This material must not be acted on or relied on by persons who are not UK relevant persons. Any investment or investment activity to which this material relates is only available to UK relevant persons and will be engaged in only with UK relevant persons. A description of J.P. Morgan EMEA's policy for prevention and avoidance of conflicts of interest related to the production of Research can be found at the following link: [J.P. Morgan EMEA - Research Independence Policy](#).

U.S.: J.P. Morgan Securities LLC ("JPMS") is a member of the NYSE, FINRA, SIPC, and the NFA. JPMorgan Chase Bank, N.A. is a member of the FDIC. Material published by non-U.S. affiliates is distributed in the U.S. by JPMS who accepts responsibility for its content.

General: Additional information is available upon request. The information in this material has been obtained from sources believed to be reliable. While all reasonable care has been taken to ensure that the facts stated in this material are accurate and that the forecasts, opinions and expectations contained herein are fair and reasonable, JPMorgan Chase & Co. or its affiliates and/or subsidiaries (collectively J.P. Morgan) make no representations or warranties whatsoever to the completeness or accuracy of the material provided, except with respect to any disclosures

relative to J.P. Morgan and the Research Analyst's involvement with the issuer that is the subject of the material. Accordingly, no reliance should be placed on the accuracy, fairness or completeness of the information contained in this material. There may be certain discrepancies with data and/or limited content in this material as a result of calculations, adjustments, translations to different languages, and/or local regulatory restrictions, as applicable. These discrepancies should not impact the overall investment analysis, views and/or recommendations of the subject company(ies) that may be discussed in the material. Artificial intelligence tools may have been used in the preparation of this material, including assisting in data analysis, pattern recognition, and content drafting for research material. J.P. Morgan accepts no liability whatsoever for any loss arising from any use of this material or its contents, and neither J.P. Morgan nor any of its respective directors, officers or employees, shall be in any way responsible for the contents hereof, apart from the liabilities and responsibilities that may be imposed on them by the relevant regulatory authority in the jurisdiction in question, or the regulatory regime thereunder. Opinions, forecasts or projections contained in this material represent J.P. Morgan's current opinions or judgment as of the date of the material only and are therefore subject to change without notice. Periodic updates may be provided on companies/industries based on company-specific developments or announcements, market conditions or any other publicly available information. There can be no assurance that future results or events will be consistent with any such opinions, forecasts or projections, which represent only one possible outcome. Furthermore, such opinions, forecasts or projections are subject to certain risks, uncertainties and assumptions that have not been verified, and future actual results or events could differ materially. The value of, or income from, any investments referred to in this material may fluctuate and/or be affected by changes in exchange rates. All pricing is indicative as of the close of market for the securities discussed, unless otherwise stated. Past performance is not indicative of future results. Accordingly, investors may receive back less than originally invested. This material is not intended as an offer or solicitation for the purchase or sale of any financial instrument. The opinions and recommendations herein do not take into account individual client circumstances, objectives, or needs and are not intended as recommendations of particular securities, financial instruments or strategies to particular clients. This material may include views on structured securities, options, futures and other derivatives. These are complex instruments, may involve a high degree of risk and may be appropriate investments only for sophisticated investors who are capable of understanding and assuming the risks involved. The recipients of this material must make their own independent decisions regarding any securities or financial instruments mentioned herein and should seek advice from such independent financial, legal, tax or other adviser as they deem necessary. J.P. Morgan may trade as a principal on the basis of the Research Analysts' views and research, and it may also engage in transactions for its own account or for its clients' accounts in a manner inconsistent with the views taken in this material, and J.P. Morgan is under no obligation to ensure that such other communication is brought to the attention of any recipient of this material. Others within J.P. Morgan, including Strategists, Sales staff and other Research Analysts, may take views that are inconsistent with those taken in this material. Employees of J.P. Morgan not involved in the preparation of this material may have investments in the securities (or derivatives of such securities) mentioned in this material and may trade them in ways different from those discussed in this material. This material is not an advertisement for or marketing of any issuer, its products or services, or its securities in any jurisdiction.
